

StampaJet BP-150

StampaJet BP-150 - Digital Fabric Printing Made Easier

StampaJet BP150 a new generation low cost textile printer, utilizing an all in one fabric transport system and curing station, designed for digital fabric printers who require easy to use equipment, high print speeds and exceptional quality. The StampaJet BP-150 with its integrated, ink and fabric versatility and exceptional color control, combined with a competitive price and small footprint opens new opportunities to textile digital printing.

600+ ft²/h Plug & Print Digital Textile Printer

Digital textile printing is finally made easy thanks to the StampaJet's top quality print results at production speeds of 39 linear yards per hour*. The machine requires minimal assembly and ships with our proven Evolution RIP © software which makes fabric printing simple and repeatable. Just connect the electric power, load the inks and go.

*Depending on color number, resolution and pass - see the production table on the back side of the brochure.

New Print Head Providing Speed, Versatility and Quality

The StampaJet BP-150 comes with the latest 8 channel variable dot Epson print head addressable to 1440 DPI. The distance from the print heads and the fabric surface is manually adjustable. On board cleaning and maintenance provides quick and easy head cleaning to keep you up and running.

Integrated Fabric Handling and Curing System

The fabric transportation system allows users to load fabric print and cure without the time or labor for a two step process. A precision winding unwind mechanism moves fabric precisely and smoothly through the curing system providing the correct amount of curing time. StampaJet is ideal to print on a wide variety of fabrics.

Winding and Unwinding System

StampaJet BP-150 allows for large roll up to 220lb to be loaded in order to give a user the ability to do large unattended runs.

Hot Air Curing Dryers

StampaJet BP-150 utilizes hot air curing in a self contained chamber and ships with an air filtration system. Loading fabric into the dryer is hands free providing a user piece of mind that they cannot get burned. The curing chamber is digitally controlled for optimal working temperature and speed.

Bulk Ink Supply System

The StampaJet BP-150 can print with disperse, pigment and sublimation inks via 440 ml cartridges or a refillable bulk ink feed system.

DigiFab Systems

MODEL	StampaJet BP-150
Printer	Variable dot piezo print heads
Print heads - Colors	1 extra wide 1440 nozzles piezo print heads, 8 chanel, 8x180 nozzle rows
Print heads level	Manual print head level adjustment for different media thickness
Print head cleaning	Automatic print head cleaning cycle
Print Resolutions	360 - 720 - 1080 - 1440 dpi at 2, 4, 6, 8, 10,12 or more passes - unidirectional & bidirectional
Fabric transport	Automatic roll unwind and rewind units, with speed/tension control
Print width, roll size	Maximum print width: 161 cm (63,3") Maximum roll size may depend on weight (up to 220 lbs)
Print speed / Resolution	4 Colors - 360 x 720 dpi, 4 pass, bidirectional, 320 ft ² /h or 21 linear yd/h 6 Colors - 540 x 720 dpi, 6 pass, bidirectional, 163 ft ² /h or 11 linear yd/h 4 Colors - 540 x 1080 dpi, 6 pass, bidirectional, 256 ft ² /h or 17 linear yd/h 6 Colors - 540 x 1080 dpi, 8 pass, bidirectional, 158 ft ² /h or 10 linear yd/h
Ink feed system	Ink feed system 2 x 4 or 1 x 6; 440 ml or refillable ink cartridges
Inks	Acid, Reactive, Disperse, Pigments, Sublimation 4 colors or 8 colors
Interface	USB 2.0
Noise level	50 dB - 70dB (printer only - does not include exhaust)
Dimensions	Width: 102" - Depth: 34" - Height: 67" Weight: 950 lbs
Electric supply	Printer: AC120V - 240V - 50/60Hz Curing Unit : AC 220-240V - 50/60Hz - 30Amp installed power - working power may be lower
Working environment	Temperature range: 20-35 °C/ 68-95 °F - Humidity 35-65 % rh
